

## Universal Consulting Services

---

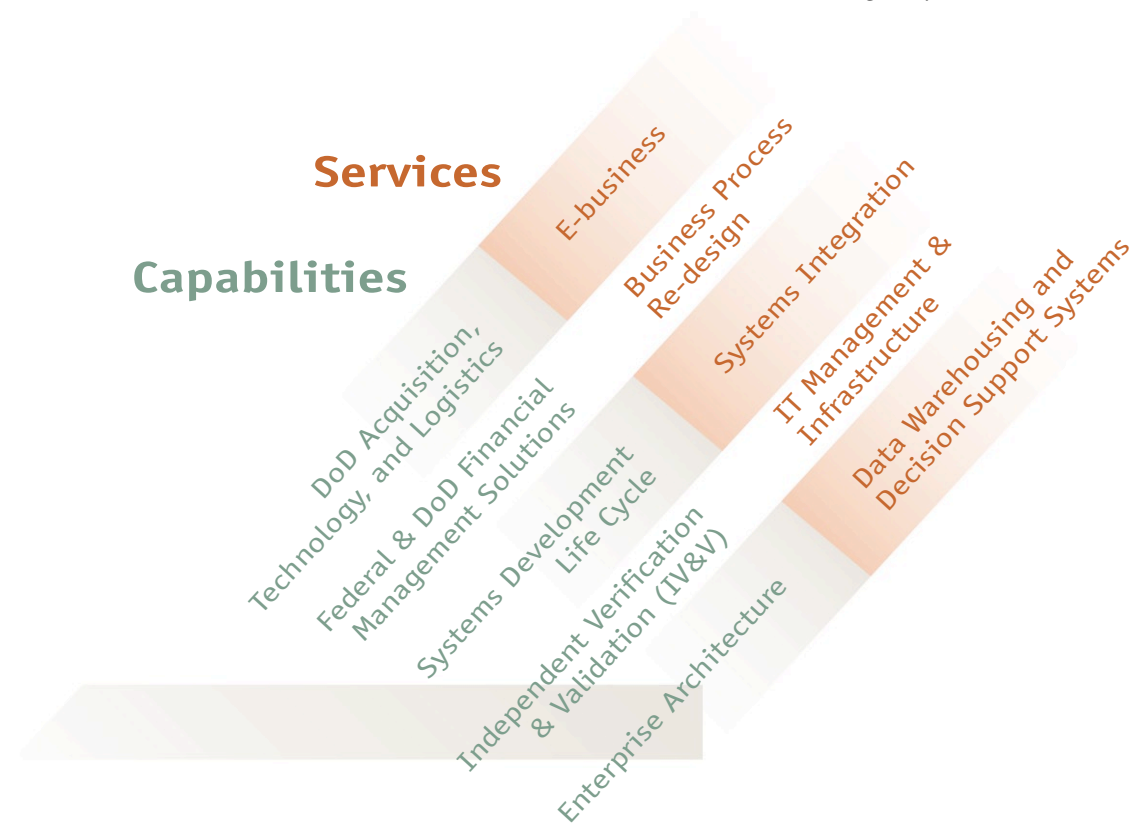

**Business Process and  
Technology Solutions for the  
Department of Defense  
and Federal Civilian Agencies**

As government transitions to an integrated, enterprise-wide approach, UCS provides strategic services tailored for the Department of Defense (DoD) and federal civilian agencies. We understand the process of achieving public sector initiatives, and we provide best-in-class IT management services to deliver greater efficiency, enhanced citizen service, reduced costs, and improved accountability and compliance.

### Revolutionizing DoD and Federal Civilian Business

With unparalleled industry knowledge and technical insight, UCS offers a proven approach for success based on decades of collective experience and expertise. Our client loyalty is a testament to the value we bring, as our IT management capabilities combined with our superior services enable you to achieve optimal performance with a lower total cost of ownership. UCS's sole focus is to help you execute your vision by improving processes and applying technology intelligently.

### Strategic Services

Our full spectrum of business process and IT services include:

**E-business.** UCS provides the tools and expertise to help you collect and manage stores of valuable data and process all critical workflow functions electronically. Leveraging in-depth knowledge in the areas of procurement, logistics, and finance, our solutions enable greater visibility and transparency across the enterprise. With improved cross-agency integration and information sharing, you can achieve increased productivity and reduced costs.

**Business Process Re-design.** UCS helps define a clear vision of your future operations with critical analyses of your as-is processes, inputs, and outputs to identify opportunities for enhanced business practices. We offer practical recommendations for streamlined management workflows across multiple business applications and organizations, and a strategic framework to improve efficiency in a collaborative, cost-effective manner.

**Systems Integration.** UCS supports seamless, enterprise-wide integration across multiple systems within different agencies and departments. We help organizations implement a wide variety of custom development and integration services to support efficient information sharing and technology selection. Services include analyzing data exchange and data ownership issues, identifying systems to be linked, analyzing timeframe requirements, establishing business rules, and developing interfaces.

**IT Management and Infrastructure.** UCS helps to efficiently execute tasks, actively identify and mediate project risks, and successfully monitor projects to achieve target outcomes. Our expertise combines program management and project management best practices for seamless integration and interoperability between platforms, and requirements coordination in areas such as project planning, training, technology standards, implementation, communications, and knowledge management. Our third-party oversight helps validate and ensure the highest standards for multi-faceted IT program management needs.

**Data Warehousing and Decision Support Systems.** UCS supports strategic planning, development, and implementation to help coordinate critical and relevant information across complex constituencies. By providing a comprehensive view of disparate data sources at an enterprise level, our solutions enable effective, rapid synthesis and translation of structured and unstructured information. We also leverage data warehousing tools such as ETT (extraction transformation and transport) to help you uncover nonobvious patterns and relationships for improved decision making and planning.

Partnering with UCS, you can tap into a wealth of resources that improve business in the context of federal constraints and e-government initiatives. Our expert consultants are committed to address your needs with a disciplined yet flexible approach. UCS drives results that help you achieve mission-critical priorities.

## Capabilities

---

Our capabilities include focused areas of domain knowledge that reinforce the strength of our services, resulting in integrated solutions with a deeper layer of expertise to deliver best-in-class solutions.

**DoD Acquisition, Technology, and Logistics**—improving procurement decisions and contracting activities in the end-to-end acquisition process.

**Federal & DoD Financial Management Solutions**—delivering comprehensive, federal-specific financial management tools for improved operations and compliance.

**Systems Development Life Cycle**—developing systems requirements, integrating technology standards, and incorporating best practices to reduce risk and ensure project success.

**Independent Verification and Validation**—providing day-to-day project management support and third-party oversight to validate and ensure program management best practices.

**Enterprise Architecture**—building an infrastructure to support complex business applications and applying advanced technology standards to achieve enterprise-wide integration.

## Turn to a partner you can trust—UCS

---

To meet the public sector imperatives for increased efficiency, economy, and accountability, UCS's domain and technical expertise are invaluable. Underlying our proven track record of success is an in-depth understanding of DoD and federal civilian agency operations and requirements. We are focused on your business needs and strategic in our delivery of tangible results.

### Universal Consulting Services

**(UCS)** is a leading business process and technology solutions provider. Founded in 2000, UCS's core strength is its expert consultants with deep domain knowledge and skilled capabilities in the areas of business processes, program management, and systems implementation. We are a catalyst for improving business performance across all levels of government through our full spectrum of value-added enterprise solutions.
